

6.10.2010

Northnet Incorporated has had a great year and is busily working at its calendar for 2011. Over the last 12 months Northnet has assisted over 2670 people to further their careers by offering affordable training programs.

Undertaking a qualification at Northnet has some great advantages including:

- Some programs being offered are supported by the Department of Education and therefore do not attract a large fee.
- All programs are nationally recognised and include a work experience unit to allow students to practice their skills in a real working environment while also giving the employer the opportunity to “try before they buy”.
- Relaxed, friendly atmosphere where students will be coached and guided through their training to ensure a maximum skills transfer from the classroom to the working arena.
- Affordable time payment schedules to allow students to pay their course off over the duration of the training.
- All trainers employed by Northnet are experts in their vocational field and keep current skills related to their field of training.

The General Manager, Bronwyn Musgrove says 2011 will be an exciting year and Northnet already has many students enrolled and eager to start their course in January. “Enrolling now means the worry of ensuring they don’t miss out on a place is gone and they can relax and enjoy the festive season knowing their plans for next year are complete.”

Northnet offers qualifications from Certificate II to Diploma level. Students will gain these qualifications in a year and be working and earning money before they know it. All ages are welcome.

Northnet prides itself in being able to be flexible while maintaining a campus of excellence. All staff are ready to answer any questions you may have about your training plans. Come on in and have a chat.
